**Re: T02 - How did it go? Click here and provide your comments.**by [Lane Dethrow](#) - Tuesday, June 16, 2020, 4:41 PM

I thought I knew quite a bit about graphing with Excel, but I learned lots of little tricks such as changing axis numbers or a quick way to change colors, axis title angles, etc. I knew very little about using the Control key to select various data sets to create different kinds of charts so that was helpful! The only thing that would have made it better would have been an explanation of the Mac shortcuts as well as the regular ones, as I feel most students use a Mac and I had to go out and search a couple. Besides that, it was a good review assignment!

Sum of ratings: [2 \(1\)](#) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Nicholas DiMaggio](#) - Thursday, June 18, 2020, 3:19 PM

I found the most helpful way to complete the assignment is to walkthrough the video step by step working on my project, pausing as needed. The only struggle I had were sometimes the instructions were slightly different from what I saw on my screen and my version of excel, how ever this was nothing major.

Sum of ratings: [2 \(1\)](#) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Phuc Lovan](#) - Thursday, June 18, 2020, 9:27 PM

The video was very straight forward and I followed along and paused when I needed to. I only ran into one problem which I still do not understand why it happened. While creating the frequency tables for the 2nd page "M&M Weights" I highlighted the data points I wanted but Excel kept including the 0 value even though I did not highlight it and it made my graph off. The only fix I found was to just manually enter the data points on a separate cell to create the right chart.

Sum of ratings: [2 \(1\)](#) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Justin Erlandson](#) - Friday, June 19, 2020, 5:49 PM

Having the video side by side with my excel sheet and following along with it was very helpful and taught me some valuable tricks with organizing and formatting data. Very straightforward and a fun assignment!

Sum of ratings: [2 \(1\)](#) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Brandon Ellingson](#) - Sunday, June 21, 2020, 7:18 PM

As with Madelyn, I had an issue with using the Control key. I quickly figured out that my issue was due to using Office 365's online version of Excel. When opened in the Desktop App, many of my woes (including changing chart data, which was unavailable online) went away. I learned about using combination charts/graphs, which I did not know about in Excel before this assignment. The video was very informative and helpful. Thank you!

Sum of ratings: [2 \(1\)](#) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)

**Re: T02 - How did it go? Click here and provide your comments.**by [Kelly Clausen](#) - Sunday, June 21, 2020, 7:35 PM

Following along with the video as I completed this assignment truly helped a lot! There are a few little things here and there that I found myself having issues with. For example, some of the formulas were not copying correctly and I had to try and figure out what was going on. Also, I am not sure which Excel version I have. I thought I had the newest one, but some of the keys were different than what was shown in the video so I had to try and figure out where they were.

Sum of ratings: [2 \(1\)](#) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Rick Jerz](#) - Sunday, June 21, 2020, 8:01 PM

Sometimes my videos might be using a newer version than what you have, Kelly, sometimes the same, and sometimes older. I am always redoing my video every two or three years, but one by one.

Sum of ratings: [-](#)[Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Thomas Wahl](#) - Monday, June 22, 2020, 10:00 AM

I thought the Excel graphing task for topic 2 went really well! The video was very helpful to watch and pause when I needed some further instruction. The frequency function and combination chart were the most difficult for me since I have never done them before, but after watching the walkthrough of those sections a few times I was able to get the hang of it. Overall, the assignment went by really good, and it was a nice refresh of how to use many different components of Excel!

Sum of ratings: [2 \(1\)](#) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Morgan Pritchard](#) - Monday, June 22, 2020, 5:58 PM

Overall, I thought the assignment went fairly well. I would say that the only difficult issue was trying to keep up with your instruction while also needing to research how to do the things you were doing, but on a MacBook. However, I learned tons of cool new tools and quick tricks to make graphing data a lot easier!

Sum of ratings: [2 \(1\)](#) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Caleb Kitzman](#) - Monday, June 22, 2020, 7:09 PM

Overall I think this assignment went well. This was a really good introduction to graphing with Excel, and really helps show the capabilities of the program that many people are not aware of. The instruction was very clear, and though moves fast at times, you can always pause to catch up and experiment along the way. The key shortcuts introduced are also really helpful, and will be useful in the future.

Sum of ratings: [2 \(1\)](#) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Daniel Ungari](#) - Monday, June 22, 2020, 8:08 PM

I thought the assignment went well. I thought it was very helpful to be able to reference the video while I was working on the assignment. I think this assignment was a good way to review excel while also teaching me how to do a few new things.

**Re: T02 - How did it go? Click here and provide your comments.**by [Devin Tolbert](#) - Tuesday, June 23, 2020, 8:51 AM

I thought this assignment went really well, the video walkthrough was very helpful. I've used Excel in a couple of classes before and have a decent understanding of it, but I definitely learned some new things. Excel seems to be a very commonly used software at a lot of companies, so I always enjoy learning more about it.

Sum of ratings: 2 (1) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Spencer Odekirk](#) - Tuesday, June 23, 2020, 11:29 AM

The video helped to cement a lot of the ideas within the chapter. I appreciated your thorough explanations of the various functions and features unique to Excel, walking through the process step-by-step definitely increased my confidence in using this software. Although I was on a Mac I didn't seem to have any major issues.

Sum of ratings: 2 (1) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Rick Jerz](#) - Wednesday, June 24, 2020, 8:02 AM

Spencer (and others,) you should be able to continue using your Mac in this course. I have designed this course to be very Mac-friendly. Yes, there will be times where you might need to translate, or probe a little on your own, when your Mac seems to be missing a feature.

Sum of ratings: -[Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Kelsey Jones](#) - Tuesday, June 23, 2020, 11:49 AM

I was having some difficulty with this task at first because I was using the online version of Excel on my mac and a lot of the features in the video were different. I eventually was able to update my mac and download the actual excel on my computer and once I completed that I actually found this topic very cool and easy to complete. The video was very helpful and I was able to complete all of my graphs without any trouble at all!

Sum of ratings: 2 (1) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Sam Nielsen](#) - Tuesday, June 23, 2020, 4:55 PM

After watching the video and completing the assignment I found it best to just follow the video and pause to work on the assignment when needed. I learned quite a few little tricks such as selecting multiple data sets and learning how to use the frequency command. Overall the assignment was very informative.

Sum of ratings: 2 (1) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Kellie Judas](#) - Tuesday, June 23, 2020, 10:09 PM

For the most part I think the assignment went well. Following along with the video while doing the assignment was a huge help. I did have some issues with converting the formulas to a Mac version and couldn't figure out how to get my horizontal axis values as the midpoint numbers. My version was different from the one you showed and I couldn't find where or how to input that. Everything else went pretty smooth.

This was a fun, creative assignment that went well. I definitely learned how to better manipulate graphs and data with this lesson!

Sum of ratings: [2 \(1\)](#) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Nathan Vanderheyden](#) - Thursday, June 25, 2020, 5:35 PM

I really enjoyed the exercise and was able to expand on my previous Excel knowledge. I thought it was especially useful for us to complete the activity ourselves while watching the video, rather than just reading or viewing the material. I found the keyboard shortcuts to be quick and easy to understand and implement. Particularly, I appreciated discovering new techniques such as the frequency function. The only difficulties I had were with the format of Excel. I was using Excel 2019, instead of Excel 2016 as depicted in the video, so some of the ribbon features and tools were different. However, I was eventually able to locate and use all of the same features.

Sum of ratings: [2 \(1\)](#) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Matt Messer](#) - Thursday, June 25, 2020, 9:22 PM

It went okay, think the version of excel you use is older. When I was following along some of the tools were located in a different spot. it just took longer because I had to pause the video to search for what you were explaining.

Sum of ratings: [2 \(1\)](#) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Rick Jerz](#) - Thursday, June 25, 2020, 10:06 PM

Yes, but this is an excellent way to learn, Matt. You will remember more of what you learned.

Re: T02 - How did it go? Click here and provide your comments.

by [Grace Klopstad](#) - Friday, June 26, 2020, 2:41 PM

After completing the Excel graphing exercise I learned how to use the frequency function-- I found it interesting that you have to use Ctrl+Shift+Return, rather than just clicking 'Return'. The most tedious part of the assignment was inputting the 100 data points, it wasn't necessarily difficult, but I had to do some double/triple checking to make sure I had all of the correct data points inputed. I enjoyed the video, as it covered the content of this topic well and gave a clear walk through for the assignment, which was helpful.

Re: T02 - How did it go? Click here and provide your comments.

by [Scott Gilloley](#) - Friday, June 26, 2020, 4:28 PM

I thought everything was quite easy to follow. The frequency function is quite useful and I have never used it before. The only suggestion I would have is at the very end of the video when you show the charts, have them be the same as we had made prior. I noticed the axis labels were no longer on them when in the video you told us how to add them very specifically. I left them on because I like to know the axis measurements.

by [Martin Huang](#) - Friday, June 26, 2020, 7:31 PM

The online video lecture helps a lot! I had taken the same course and ended up dropping it because the professor went too fast, and I could not catch up. In the video, I can always go back or pause it whenever I couldn't catch up. This video helps a lot. This was actually my first time making charts like this, and I learned a lot from it!

Re: T02 - How did it go? Click here and provide your comments.

by [Zach Cusick](#) - Friday, June 26, 2020, 7:51 PM

It was easy to follow especially since I was able to follow along with the lecture as I was making the graphs. All of those tools are very useful. I thought I was pretty decent at Excel before but after watching that lecture and using all of those tools I realize there is a lot left to be learned.

Re: T02 - How did it go? Click here and provide your comments.

by [Rick Jerz](#) - Friday, June 26, 2020, 8:52 PM

As a side note, Martin, the video player has a control to slow down or speed up the video. Check it out.

Re: T02 - How did it go? Click here and provide your comments.

by [Haofeng Shang](#) - Friday, June 26, 2020, 7:50 PM

I think the video is a very good way for teaching us how to use the Excel and how to effectively deal with the data problem. Actually, there still are some room for me to improve, like using Frequency, Sum, and Ctrl on the keyboard. I followed the video to finish the homework, and i think this is necessary and very helpful!!

Re: T02 - How did it go? Click here and provide your comments.

by [Tyler Zahn](#) - Friday, June 26, 2020, 8:01 PM

The only issue that I had was at the very end when we had to switch the value back by .0001 for the categories when doing so it upset all the other values I had in my graphs and they went blank. I was not able to find a fix for it. Other than that the videos were helpful.

Re: T02 - How did it go? Click here and provide your comments.

by [Nicolas Hobbs](#) - Friday, June 26, 2020, 8:39 PM

This was the first time I had to make multiple graphs using Excel, and I thought it went really well. I hadn't done anything like this since high school, and your video made completing the project much easier, especially because it was very easy to follow the steps. I appreciated how you showed us small tricks within Excel to make our work easier, and if I had any further questions it was easy to Google things to find out.

Re: T02 - How did it go? Click here and provide your comments.

by [Andrew Sessa](#) - Friday, June 26, 2020, 8:45 PM

I found the video very straight forward to follow along to and helped me fully comprehend what we were trying to achieve with each chart. I found the step by step video very insightful and will certainly apply to other assignments in the future. The only struggle I had at times was finding things in different places on my own version of excel.

**Re: T02 - How did it go? Click here and provide your comments.**by [Mary Kate Mardesen](#) - Friday, June 26, 2020, 9:15 PM

I am happy I took this class online so I could complete the assignment as you went through it yourself, leaving me time to pause and rewind when needed. This format is very helpful! I have hardly used excel, so I really appreciate the thorough walk through. I would change a few steps, maybe having an excel sheet with all the data on it already (like the first excel "assignment" from week 1), slowly the video when you go through steps like editing the graphs, and showing the completion of the graphs as that would be very helpful for someone like myself who is a little more green to excel. Overall, a great and enjoyable assignment and learned the basics of making a graph!

Sum of ratings: [2 \(1\)](#) [Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Julie Vargas](#) - Friday, June 26, 2020, 9:25 PM

After watching the video there were a few things that wouldn't work on my Mac but I looked them up. Things such as when doing a non-contiguous data you said push control but for Mac users it is command. The shortcut to toggle information on opposite ends of each other with other information in the middle is F4 in Windows, while on a Mac, it is Command T. I followed along with the video as I did my assignment and it was pretty straight forward.

Download Bootcamp. It lets you go between MAC OS and Windows 10. Makes life simpler.

Sum of ratings: [-](#)[Permalink](#) [Show parent](#) [Edit](#) [Split](#) [Delete](#) [Reply](#)**Re: T02 - How did it go? Click here and provide your comments.**by [Ashley Weide](#) - Friday, June 26, 2020, 9:25 PM

I absolutely loved being able to walk through and rewind as many times as needed with the video. I learned you definitely have to be careful to press the "fn" key instead of the "ctrl" key with "f4". I am still not 100% sure what happened but my entire document disappeared and I thought I lost the entire thing. Thank goodness for auto save. Thank you for all the neat tips in Excel. Always great to have shortcuts.

I thought this was assignment was a nice intro to using graphs and more tools that we will continue utilizing. The most difficult part for me was figuring out how to do different commands on my Mac excel. It slowed me down and was a little harder to follow along with the video. Is it possible we can download the same version of excel that you use in your videos so it will be easier to follow along with? Overall nice first excel assignment.

Re: T02 - How did it go? Click here and provide your comments.

by [Inga Agasandyan](#) - Friday, June 26, 2020, 11:53 PM

I found out that I don't know as much about Excel as I thought I did. I think the walkthrough video was very helpful and I learned lots of little tricks I had no clue about. My version of Excel is a bit different from the one used in the video so that made it a little bit more difficult, but overall I think this was a very helpful assignment!
